

# IOT Based Road Accident Detection and Prevention System

A system to effectively help in preventing any kind of mishaps and if such conditions occur then detect it and inform the concerned people, so that the situation can be taken care of immediately

Stopping the vehicle  
when the engine  
temperature raises  
above the threshold

Reduces the speed of  
the car when the  
driver is detected to  
be drunk

Sends message alerts  
when the car meets  
with an accident
